Description: This product is a water-based formula used for cleaning and polishing stainless steel, chrome, formica, copper, aluminum, brass, and other hard surfaces. It is a water-in-oil emulsion, where the oil surrounds the water and contacts the surface to be cleaned first. This allows the product to act like a solvent (oil-based) system while not having its oiliness or flammability. This product is ideally suited for use in food preparation areas, where the odor of mineral spirits and aromatic solvents would be objectionable. This pleasantly fragranced product cuts through grease and oil while leaving a protective shine.
