## DUAL P3 RESIDUAL INSECTICIDE

**Features:**

- RTU Water-Based Flying/Crawling Insect Killer
- Residual for Up To 2 Months
- Indoor/Outdoor Use
- Effective Against Ticks
- Registered in CA & NY

**Description:** This residual product represents the future of modern insecticide products. This water-based formula has one of the lowest toxicity profiles and highest activity ratings ever assembled in an insecticide. The synthetic pyrethroid Permethrin is not an organo phosphate material like Dursban, Propoxur, or Diazinon. It is both safer to use & more effective with residual activity up to 60 days after spraying - twice the usual rate. Extremely versatile, this product is a dual-purpose insecticide capable of effectively controlling both flying and crawling insects in residential, commercial, industrial, & agricultural settings. The long list of controlled species includes fleas, lice & their eggs, ticks, ants, flies, mosquitos, cockroaches & many more. It can even be used in fogging applications, space spraying, & crack/crevice treatment. This product may even be applied directly to certain animals for long-lasting control of flies, fleas, ticks, lice & other insects. See label for complete use and application information.

TECHNICAL INFO:		
Physical Properties	Appearance	Emulsion
	Color	White
	Odor/Fragrance	Bland
	pH	6.0-8.0
	Freeze/Thaw Stability	Do Not Freeze
Environmental Profile	Glycol Ether Content	None
	Biodegradability	?
	Chlorinated Solvents	None
	Green Status	None
	Recyclable Packaging	Yes
Regulatory Compliance	% VOC By Weight	0.8
	Restricted States	None
	Food Processing Suitability	N/A
	EPA #	10807-199
	Flammability per CPSC	N/A
	Flash Point	None to Boiling
