

HIGH PERFORMANCE ICE MELTER

REN05100-OS
REN05101-OS

Features:

- Melts to -25° F
- Contains 10% Calcium Chloride
- Contains 2 powerful melting accelerators
- Magnesium Chloride Free

Performance:

The faster an ice melter works, the less chance there is for a mishap to occur. That's why **Renown's High Performance Ice Melter** contains two patented accelerating agents. This unique formulation will start melting faster than any other similarly formulated blend on the market today. **Renown's High Performance Ice Melter** has been shown in Strategic Highway Research Program testing, to exceed the melt value of a 30% calcium chloride blend.

No Dust:

Renown's High Performance Ice Melter undergoes a through screening process, eliminating the fine, dusty salt particles found in most blended ice melters. This screening eliminates blow back when spreading and improves melting performance.

Safe for Concrete and Vegetation:

Renown's High Performance Ice Melter will not harm concrete and vegetation when used according to label instructions. Incorporating liquid anti-icing practices with dry application rates is essential to reducing chloride and salt impacts on the environment.

Anti-Caking:

Renown's High Performance Ice Melter contains anti-caking agents that ensure easy flow for ice melt spreaders. This means a more controlled rate during application and longer storage life.

Blue Coverage Indicator:

Renown's High Performance Ice Melter contains a water-soluble, non-staining, coverage indicator making it easier to see when spreading, reducing common over application errors that result in wasted product and needless costs.

TECHNICAL INFORMATION:	
Effective Temperature	-25°F (-32°C)
Color	Blue
Calcium Chloride	10 - 15%
Weight	50 lbs (22.7 kg)
Packages Available	Bag / Carton
Patents	US# 6,039,890
	US# 8,182,714B2
