

REN05102-0S

WINTER FURY ICE MELTER

Features:

- High Performance at an economical price
- Contains 2 powerful melt accelerators
- Exceeds the melt value of a 15% calcium blend
- Magnesium Chloride Free

Performance:

Renown's Winter Fury Ice Melter is formulated with two high performance ice melt accelerators, insuring that it converts to a melting brine faster increasing both melt value and melting speed. **Renown's Winter Fury Ice Melter** has been shown in Strategic Highway Research Program testing, to exceed the melt value of a 15% calcium chloride blend.

No Dust:

Renown's Winter Fury Ice Melter undergoes a through screening process, eliminating the fine, dusty salt particles found in most blended ice melters. This screening eliminates blow back when spreading and improves melting performance.

Safe for Concrete and Vegetation:

Renown's Winter Fury Ice Melter will not harm concrete and vegetation when used according to label instructions. Incorporating liquid anti-icing practices with dry application rates is essential to reducing chloride and salt impacts on the environment.

Anti-Caking:

Renown's Winter Fury Ice Melter contains anti-caking agents that ensure easy flow for ice melt spreaders. This means a more controlled rate during application and longer storage life.

Blue Coverage Indicator:

Renown's Winter Fury Ice Melter contains a water-soluble, non-staining, coverage indicator making it easier to see when spreading, reducing common over application errors that result in wasted product and needless costs.

TECHNICAL INFORMATION:	
Effective Temperature	-5°F (-21°C)
Color	Blue
Weight	50 lbs (22.7 kg)
Packages Available	Bag
Patents	US# 6,039,890
	US# 8,182,714B2
