Latex Cautionary Statement:

Latex products can be harmful or even deadly to some individuals who are sensitive or allergic to latex proteins. Even exposure at very low levels can trigger allergic reactions in some individuals, for instance, the powder from latex gloves can contaminate not only areas they were in use, but once airborne, these particles can circulate through your building’s ventilation system, causing an unintended allergic reaction in persons far removed from the area of glove usage. For those individuals diagnosed with a latex allergy, the only cure is avoidance of latex products. **To ensure a healthy working environment, switching from latex gloves to nitrile or vinyl glove alternatives is a necessary step.**
