STAINLESS STEEL CLEANER & POLISH

A blend of special oils and solvents formulated to provide the best in cleaning, polishing, and protection of all types of stainless steel surfaces. After the solvents, which aid in cleaning, evaporate they leave behind the special blend of oils. These oils leave a pleasing luster which also serves as a protective coating to resist finger prints, grease and water spatter. In most cases the surface may be maintained by simply wiping with a dry cloth. This product does not leave a tacky surface after drying.

Features:

- Non-abrasive
- Provides protective coating
- Non-flammable

Related Benefits:

- Does not scratch surfaces
- Equipment lasts longer
- Employee safety

Important:

Read and understand the label and Material Safety Data Sheet (MSDS). These provide a description of hazards, precautions, personal protective equipment, first aid, 24 Hour Emergency lines, storage data and other safe handling information. The MSDS is provided with each container shipped. It is also available from the distributor.

To Use:

DO NOT MIX WITH ANYTHING. This product may be applied by spraying on a clean, dry cloth, or lightly spraying the surface to be treated. Spread the product over the surface using a circular motion and wipe dry. This will remove most finger marks and light soils. For areas which are more heavily soiled a precleaning step is recommended. If a water based cleaner is used, the surface must first be completely dry before applying this product. Routine use will keep surfaces looking their best and help preserve the factory sheen. For light touch-up a little buffing with a dry cloth is all that is needed.

See label for complete directions and use only as directed.

SPECIFICATION DATA	
Available Sizes:	6/1 qt.
Physical State:	Liquid
Color:	Colorless
Fragrance:	Lemon-Lime
Specific Gravity:	0.810 - 0.817
pH (undiluted):	N/A
Phosphorus:	0.00%
